

Product Warranty: Full color RGB LED display, HFC Series and HFCT Series
--

San Biagio di Callalta 2025 April 18th

HITECHLED warranty period: 2 Years (24 months)

All the terms indicated above start from the delivery of the Product(s) and any defects must be reported within the terms and according to the methods indicated in art. 7 of the [General Conditions of Sale](#) published on the website www.hitechled.it/download/.

- 1) The power supply used to operate the product must be the original Hitechled one indicated in the product data sheet. The power supply must operate within the electrical and environmental limits declared in the data sheets.
- 2) Product degradation caused by natural ageing is not considered a product defect such as the reduction of brightness over time and the color temperature deviation of the LED. The product shall not be considered defective solely due to the shutdown during the warranty period of some individual LEDs contained in the product if the total number of non-functioning LEDs is till 1% of the total number of LEDs in the product itself.
- 3) Due to the tolerances of LEDs and electronic components, the electrical and lighting data in the product specifications must be considered as reference and therefore may be subject to change. Furthermore, the intensity and color temperature of LEDs may undergo significant changes over time.
